#GAJJRAEarth

#GAJJRA

# Mission Statement:

To Create A Reliable And Evolutionary Data Visualizer Of Humane Values, Actions And Objectives That Co-Narrate Us All Towards Joyful Responsible Abundance on Earth.

We aim to achieve this by asking people and organisations from every region, tribe, language and culture on Earth to contribute their definitions of Joyful Responsible Abundance and other commonly aspired to good values and virtues.

“How would you manage  
your own time if...  
money was irrelevant *and*  
joyful responsible abundance  
was the goal of civilization?”

# Core Values:

Core Values are expected to be the next most common sense of humane intelligence after the layer of biochemical emotions.

To understand, we will survey the global population to find out what all core values are so that global common sense can begin to emerge and encourage an open internet for humanity.

# Early Governance

Centralised

Beginning in a small Centralised order as the founding team is selected and volunteer to run the 1st membership drives that expand GAJRA to its 2nd stage.

Decentralised

Becoming Decentralised as each cultural group contributes its 1st round of perspectives defining joyful responsible abundance as in local customs and core values.

Distributed

Evolving steadily into a Distributed system as early participants in each group spread the opportunity out to include more people who add their own perspectives into the data set.

# Ideal Members

## Types of Organisations
